

- AIS data: Recommendation 33/1 on **access** to and **use** of HELCOM AIS data - *request to the Secretariat*
- AIS data products:
 - [AIS Explorer](#) to compare shipping traffic intensity maps – *online tool*

- [Map and Data Service](#) and [metadata catalog](#) to view and download shipping intensity maps – *online tool*

To share more AIS data products: AIS “lines”:

- Per shiptype and year
- No ship identification (IMO, MMSI, name, callsign, etc.)
- Dimensions of the ships to be shared?

Just an idea for the future!
