## Background

DG BSAP EUTRO 4-2021 considered and agreed on formulation of most actions proposed for the eutrophication segment, based on the guidance from HELCOM 42-2021 and comments received. The meeting also agreed that DG BSAP EUTRO 5-2021 will focus on the few remaining actions that need further consideration (coloured yellow).

The attached Excel document includes the actions relevant for the eutrophication segment. The actions for which the formulation has been agreed to be satisfactory are coloured green and the actions that are still open are coloured yellow. The Meeting is invited to consider and finalize the formulation of all yellow actions, taking into account proposals made intersessionally, as detailed in the Excel attachment. The actions have been divided under provisional themes and topics and the meeting is invited to consider and agree to this division.

DG BSAP 6-2021 (22 April 2021) reviewed all the actions for which the formulation is already satisfactory (coloured green) and agreed on all actions except EN03 which has been reverted to yellow colour. The Meeting will be invited to consider and finalize these actions, taking into account the comments made at DG BSAP SEA 6-2021 as detailed in the Excel attachment.

The Secretariat has proposed target years for some of the actions which were still lacking target years. These proposals are coloured red in font the Excel attachment. Target years for other action can be proposed.

## Action requested

The Meeting is invited to:

- consider and finalize the formulation for all remaining actions for which the formulations have not been agreed;
- propose target years for all relevant actions in the eutrophication segment;
- consider the division of actions under themes and topics.
