<b>Document title</b>	Publication of BSEFS 2017
<b>Code</b>	5-1
<b>Category</b>	CMNT
<b>Agenda Item</b>	5- Publication of the Depositing of dredged material HELCOM Baltic Sea environment fact sheet (BSEFS) 2017
<b>Submission date</b>	28.08.2019
<b>Submitted by</b>	HELCOM Secretariat
<b>Reference</b>	

---

### Background

PRESSURE 10-2019 endorsed to use the final draft analysis data on handling of dredged material at sea in 2016, as a format for Baltic Sea Environmental Fact Sheet (BSEFS) on depositing of dredged material. After editorial revision of the text, the [BSEFS for 2016](#) was published at the HELCOM website in June. The BSEFS on Depositing of dredged material will be published annually during spring of the following year of data reporting, following the format agreed by PRESSURE. However, the BSEFS for 2017 will be published already autumn 2019, and the BSEFS for 2018 is scheduled to be published, according to timeframe stated above, at spring 2020.

The draft Depositing of dredged material BSEFS 2017, is included as an attachment to this document ([5-1-Att draft Depositing of dredged material BSEFS 2017](#)).

### Action requested

The Meeting is invited to consider the 2017 fact sheet and agree on its submission to PRESSURE 11-2019 for final approval and publication in autumn 2019.
