

Document title	Story map of Depositing of dredged material BSEFS
Code	7-2
Category	CMNT
Agenda Item	7 – Any other business
Submission date	28.01.2020
Submitted by	HELCOM Secretariat
Reference	

Background

PRESSURE 10-2019 endorsed to use the final draft analysis data on handling of dredged material at sea in 2016, as a format for Baltic Sea Environmental Fact Sheet (BSEFS) on depositing of dredged material. The BSEFS is produced annually based on the reported and verified data by the Contracting Parties. The newest BSEFS for Depositing of dredged material in the Baltic Sea is for the year 2017, and can be accessed [here](#).

HELCOM is exploring new and more user-friendly ways to present data and an interactive map journal, called story map (ESRI), has been produced for the 2017 BSEFS. The story map can be accessed through [this link](#).

Action requested

The Meeting is invited to consider story map and agree on its publication at the HELCOM website.
