

Ministry of Environment
and Food of Denmark

Effect, sufficiency and cost-effectiveness of measures

Linda Bistrup Halvorsen
December 14, 2018

Process

1. Compilation of existing measures

2. Gap analysis

- Evaluation of existing measures in terms of ability to reach environmental targets
- Evaluation based on expert judgement
- Mostly qualitative evaluations

3. New measures

- New measures suggested by relevant ministries with knowledge about effects and cost-effectiveness of measures
- Costs for the state and industry were estimated
- Effects and sufficiency of the suggested measures and estimated costs based on expert judgement
- Ministerial and public hearings also securing cost-effectiveness
