Working draft of the Roadmap for continued HELCOM work on economic and social analyses

This document contains a [link to the working draft of the Roadmap for continued HELCOM work on economic and social analyses](#). Paragraph 5.33 of the [Outcome of GEAR 20-2019](#) invites the Network to update the ESA Roadmap with an emphasis on adding further structure and detail.

5.33 The Meeting further agreed to invite ESA to consider in their upcoming meeting to be held on **3 June 2019**, the revision and update of the ESA roadmap into a more structured and detailed document, dividing what approach HELCOM takes for the assessment of measures and state of the environment, and what could be/will be done for the valuation etc. The review and update of the roadmap could function as an intermediate step before proposing concrete wording for the BSAP update.

Action requested

The meeting is invited to

- take note of the information as background for the discussion in the meeting
