

Baltic Marine Environment Protection Commission

Making the HELCOM eutrophication assessment
operational (EUTRO-OPER)
Video Meeting, 8 September 2015

EUTRO-OPER 6-2015

Document title	EUTRO-OPER manual, draft (v1)
Code	4-1
Category	CMNT
Agenda Item	4 – The final deliverables of EUTRO-OPER
Submission date	25.8.2015
Submitted by	Secretariat
Reference	EUTRO-OPER 1-2015

Background

In the project description, the EUTRO-OPER project has been tasked to prepare manuals / guidelines for specific products used in the eutrophication assessment information flow, including: monitoring, QA/QC management of the assessment data, aggregation of core indicator data and HEAT 3.0 assessment tool. EUTRO-OPER 1-2014 decided to combine all this information into a 'EUTRO-OPER manual', documenting the entire eutrophication assessment procedure together with test results. The draft outline of the manual was agreed by EUTRO-OPER 3-2014. This document presents the first draft version of the manual.

Action required

The meeting is invited to discuss and comment the draft and guide the work forward.

The first version of the draft EUTRO-OPER manual may be found at the 'EUTRO-OPER manuals' workspace in the HELCOM Meeting Portal: <https://portal.helcom.fi/workspaces/EUTRO-OPER-66/default.aspx> .
