

Analysing sufficiency of measures

Timing: ongoing – end 2020

- Analyse how far already existing and agreed measures will contribute to the improvement of the Baltic Sea (by early 2020)
- Carried out by interdisciplinary platform/project
 - SOM Platform; *ad hoc* group established by HOD 55-2018
 - HELCOM ACTION project; co-financed by the EU
- Kick-off meetings held in February 2019
- SOM Platform and SOM analyses (document 3-3)
- Fish as part of the SOM analyses (document 3-7)
- Selected activities of ACTION project (document 3-6)

Organization of the BSAP update

Working Groups:

- Review of SOM analyses
- Validation of input to the SOM analysis
- Propose new HELCOM actions for the BSAP to HOD

SOM Platform /ACTION project:

- SOM analyses, prepare background information to support proposals on new HELCOM actions

SOM Platform:

- analysis of joint effect of proposed new actions for BSAP, based on one model (run by SYKE, Finland)

Synopses on tentative new HELCOM actions

- HELCOM 40-2019: can be submitted by Contracting Parties, subsidiary bodies, international projects, observers
- should be brief and make use of a template
- prepared by end of 2019
- Working Groups to review the synopses
- When SOM analyses and synopses ready (spring 2020);
HELCOM thematic workshops/meeting to discuss results and propose new HELCOM actions for the updated BSAP
