

Work plan and future activities of FISH PRO III

Work plan and future activities of FISH PRO III

- **Project proposal FISH PRO III**

- Further develop Core indicators
- Develop additional indicators (size related indicators)
- Contribute to HELCOM Thematic assessments and Red list of species
- Provide recommendations for EBM for coastal fish
- Produce a fourth thematic assessment on coastal fish
- Alternative data sources for status assessments and monitoring
- Expand spatial coverage of monitoring
- Update coastal fish monitoring manual when needed
- Provide expert proposals and management measures for coastal fish
- Support the development of relevant research (especially the effects of essential habitats and external pressures for coastal fish CORE indicators responses)

Work plan and future activities of FISH PRO III

- **Work plan State and Conservation (FISH PRO III):**
 - Review and update monitoring guidelines (cont.)
 - Develop coordinated monitoring programs (cont.)
 - Develop data arrangements and data flow (cont.) ?????
 - Indicator development (cont.)
 - Thematic assessment on coastal fish (post 2020)
 - Update BSEFS (annually/when new data is available)
 - Where possible link red listed species to habitats (2019)????
