Background

The two NGOs Coalition Clean Baltic and WWF are organising a conference 'Greener Agriculture for Sustainable Sea' the 25-26 September in Warsaw, Poland. The conference will gather key representatives from the agricultural and environmental field around the Baltic Sea region, providing an important opportunity for the sharing of ideas, concrete solutions and collaborative approaches. The organisations would welcome HELCOM and the Contracting Parties to join the conference to share and learn about approaches to applying greener agriculture practices in the region. This year's winners of the WWF Baltic Sea Farmer of the Year Award will also be announced and celebrated, including winners from Belarus and Ukraine.

Action requested

The Meeting is invited to take note of the save the date for the conference.
