<b>Document title</b>	Proposal for NECA roadmap
<b>Code</b>	4-9-WP.1
<b>Category</b>	DEC
<b>Agenda Item</b>	4 – Airborne emissions from ships and related measures
<b>Submission date</b>	5.11.2014
<b>Submitted by</b>	Drafting group
<b>Reference</b>	MARITIME 14-2014, document 4-7

---

Referring to document 4-7 submitted by Denmark (Draft road-map for future work on the Baltic Sea NECA application), the drafting group is proposing the following way forward:

- report to HOD:
  - broad consensus that a roadmap on the further process is valuable and needed (draft as annex)
  - no common views on time lines - differing views; therefore put blank space within brackets for further discussions
  - general support for the dialogue meeting between the Baltic Sea and North Sea countries to be held during 2015
  
- The Meeting informs the HODs that within the framework of the sub-group
  - the roadmap will be further developed under the lead of Denmark, with the aim to present for adoption, after the written approval of the Maritime Group, a draft Roadmap for the HOD/HELCOM commission meeting in March 2015,
  - that there will be discussions on technical issues on availability of technology to meet the NOx TIER III requirements
